

Microsoft 365 Security Kit

Secutec SecureSIGHT

Prevent now, secure tomorrow

Eliminate blind spots in your Microsoft 365 environment

The Secutec Microsoft 365 Security Kit is a fully managed, automated solution designed to proactively detect and remediate misconfigurations and vulnerabilities in Microsoft 365 environments. Leveraging industry-standard benchmarks and real-world threat models, it performs 99+ security checks daily to ensure your setup remains compliant, secure, and aligned with Microsoft's constantly evolving configuration landscape.

How it works

With a simple, secure connection to your Microsoft 365 tenant, the Security Kit scans and evaluates key security areas, eliminating the need for time-consuming and complex manual checks to identify missing or unsecure configurations.

Key focus areas include:

Multi-Factor
Authentication
(MFA)
enforcement

Phishing and
spoofing
protection

Identity
and access
management

Mail flow and
content
scanning

Authentication
protocol
hardening

External
sharing and file
collaboration
monitoring

The M365 Security Kit provides integrated clone detection

Examples of critical security checks

- No MFA for admins
- Overview of MFA status for all users
- Too many global administrators
- Dangerous file types allowed in emails
- Insecure MFA setup (e.g. SMS-based)
- Optimal settings for the Authenticator app
- No warning banners on external emails
- Misconfigured SPF, DKIM, or DMARC records
- Weak or custom passwords allowed (e.g. "1234")
- Use of file sharing platforms like Dropbox or Box
- Phishing detection notification: check for fake Microsoft login pages
- ...

Test the Microsoft 365 Security Kit for free for 30 days and experience the peace of mind of continuous, expert-driven security. Go to secutec.com/M365-security-kit for more info.

Continuously patrolling your digital perimeter

Secutec SecureSIGHT's **managed service** offers the most cost-efficient solution that covers the most crucial aspects of a cyber attack's life cycle by analyzing a wide range of attack vectors and indicators of compromise. The **Secutec Security Operations Center (SOC)** collects all data about possible attacks, adds context to alerts and provides you with actionable data and interpreted insights.

Leveraging your current security infrastructure, Secutec SecureSIGHT presents **11 different modules** tailored to your specific requirements.

MySecutec | Take control of your cybersecurity

The MySecutec portal allows you to be more engaged with the security results of your organization. It offers a **clean, intuitive dashboard** that brings together **all essential security data in one place** such as assets, reports, threats, and accepted risks.

With actionable insights, you can quickly identify, prioritize and address the most critical vulnerabilities, track asset risk levels, and follow up on threats with built-in notes, filters, and export options. Real-time alerts for critical threats are delivered via email, ensuring you're always informed and able to act immediately.

Your central security hub, always at hand

The MySecutec App gives you **real-time access** to your cybersecurity posture - wherever you are.

With the app you can:

- Instantly access your cybersecurity data
- receive real-time alerts for critical vulnerabilities
- track your security score, threats, and risks live
- effortlessly monitor and manage credential breaches
